Vincent Kapoor

CEO, Carbon Tech.
St. 103, Chennai Road,
G-7/3, Islamabad

Dear Mr. Kapoor,

In response to a job posting on LinkedIn.com, I'm writing to express my interest in the full stack developer position at Carbon Tech Software House. It's been a month since I received my degree in software engineering, which primarily consists of modules on software design and architecture, algorithms, data structures, programming, and even technical writing. These courses not only laid the groundwork for my programming principles; they also assisted me in using those concepts to communicate the module results in an efficient and expert manner. More importantly, as part of my senior project, I conducted extensive research on JavaScript with the goal of creating a new JavaScript module that will take into account web 3.0 apps.

Despite the fact that I recently graduated and have no genuine work experience, I am incredibly committed to my profession and the work I do—a trait your Job listing repeatedly praised. You will always find me driven and committed to the tasks at hand, mostly as a result of my thorough research on philosophers—Lawrence B. Glickman being my favorite.

Regarding the job's technical requirements, I've already indicated that as part of my senior project, I did a ton of research on JavaScript and the MERN Stack. I'm hoping that this knowledge will be helpful for my work at Carbon Tech. In addition, if we get more particular, I was able to create a web application for FOREX trading in just 4 months, and the program ended up drawing in hundreds of students from my university.

Similar to this, I want to push myself to work harder and become a better programmer than I am currently. I hope to improve my current abilities and the programming potential that is still untapped with the assistance of such brilliant minds working for the organization, who have outstanding work experiences, as stated by my university professor. I have enclosed a copy of my CV as an attachment in case you want to look into the specifics. I truly believe that I would be a fantastic addition to your company and vice versa.

You can reach me out on the same email address. I look forward to speaking with you soon.

Sincerely,

Daniyal Khan
